Description

This frame has an 11cm deep and 9cm wide base.

A clear acrylic glass is mounted on the base.

The frame is made of black anodized aluminium.

This thick Perspex frame has a powerful magnet embedded in each corner, which holds the front flush to the base - securing Dad's favourite family memory in between the base and the 5mm thick clear acrylic.

The black classy back/base is wide enough to ensure the frame stands lengthways independently without any need for support.

Suitable for photos 26cm x 9cm. Comes in a cardboard carton for safe transit.
