Description

Always a great Family Favourite!

The cube is the world's biggest-selling puzzle toy of all time. It has sold over 350 million units worldwide. A crazy fact about his gift is that it has 43 quintillion different possible configurations (or 43,252,003,274,489,856,000 to be precise) and only ONE solution! The rubik's cube was invented in 1974 by Hungarian Professor Erno Rubik and has remained popular and a mystery to most ever since.

You will be delighted with the quality of this gift, with vibrant colours and beautiful smooth movement through its operations. Comes in a poly bag.

A tip for Mum when she has difficulty solving it - see the experts on YouTube!
